## **DETAILED ACTION**

## Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to discloses an illumination apparatus and method thereof having. inter alia, at least one structure coupled to the first number of first light sources and the second number of second light sources so as to facilitate a mixing of the first radiation and the second radiation, wherein the apparatus is configured to provide ambient illumination including visible radiation in an environment to be occupied by an observer (claims 1 and 10); an essentially inflexible planar substrate on which all of the first light sources and all of the second light sources are mounted such that the apparatus is configured to provide ambient illumination including visible radiation in an environment to be occupied by an observer (claims 19 and 26); an essentially inflexible planar substrate on which all of first LEDs and all of second LEDs are mounted, and at least one controller coupled to the plurality of first LEDs and the plurality of second LEDs and configured to independently control at least a first intensity of the first radiation and a second intensity of the second radiation such that an overall perceivable color of visible radiation generated by the illumination apparatus is white (claims 77 and 93); at least one addressable controller coupled to the plurality of first LEDs and the plurality of second LEDs, configured to be associated with an alterable address and to independently control at least a first intensity of the first radiation and a second intensity of the second radiation so as to controllably vary an overall perceivable color of visible radiation generated by the illumination

Application/Control Number: 10/810,481

Art Unit: 2828

apparatus, and an address selection device configured to facilitate a selection of the alterable address associated with the at least one addressable controller (claim 105); at least one controller coupled to the first number of first light sources and the second number of second light sources and configured to independently control at least a first intensity of the first radiation and a second intensity of the second radiation so as to controllably vary an overall perceivable color of visible radiation generated by the illumination apparatus, wherein at least one controller is configured to independently control at least the first intensity of the first radiation and the second intensity of the second radiation using PWM technique (claims 108, 112, 114 and 116) or configured as an addressable controller capable of receiving at least one network signal including at least first lighting information relating to the overall perceivable color of visible radiation generated by the illumination apparatus (claims 109, 113, 115 and 117); at least one controller coupled to the first number of first light sources (LEDs) and the second number of second light sources (LEDs) and configured to control at least a first intensity of the first radiation and a second intensity of the second radiation such that an overall perceivable color of visible radiation generated by the illumination apparatus is white, wherein the at least one controller is configured to independently control at least a first intensity of the first radiation and a second intensity of the second radiation so as to controllably vary the overall perceivable color of visible radiation generated by the illumination apparatus (claims 118-135). The remaining claims 2-9,12-18, 20-25, 27-76, 78-92, 94—104, 106, 107,

Art Unit: 2828

110 and 111 are allowed by virtue of their dependencies on the independent claims. Hence, the examiner has allowed claims 1-10 and 12—135.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Haissa Philogene whose telephone number is (571) 272-1827. The examiner can normally be reached on 6:30 A.M.-6:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, MinSun Harvey can be reached on (571) 272-1835. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
